We need a variety of sources of reliable clean energy. Natural gas is a great choice. We need to make sure that we have a strong, robust and reliable electric production grid with new sources of clean power in each region to handle the additional load. If you believe that there is a climate crisis, then please drive forward the rapid development of new natural gas and nuclear facilities in our state. |

It's already so expensive to buy a home. Please don't put one more burden on homebuyers during this time of inflation and high interest rates! The majority party must hate home ownership, because they are putting additional burdens on home buyers. Shame on you. This stinks of graft and corruption - it's a true socialist transfer of wealth to pull the almost middle-class back down into poverty.</p>  |
